What Sets Power Equipment Leasing Co. Apart?

Since 1969 Power Equipment Leasing has been providing outstanding service to the aerial lift community. We are proud to say we have the most dependable inspectors in the Chicagoland area. Being a 3rd generation family owned & operated company, we pay close attention to detail. We are known as a leading source for aerial lifting equipment.

Rentals

Power Equipment Leasing has one of the largest rental fleets in the Midwest. We have well maintained aerial lifting equipment available for rent on a daily, weekly or 4-week basis. Power Equipment Leasing has attractive rental rates. We can help determine which piece of equipment is best suited for our customers.

Sales

At Power Equipment Leasing, we are proud of our business relationships with companies with a wide range of industries. The industries in the utility construction, government, sign & lighting, forestry, and transportation fields. Power Equipment Leasing has a large inventory to fit your needs! We also offer new and used equipment sales and custom-built units mounted on the latest chassis cabs.

Service

When you need parts or repair, Power Equipment Leasing's factory trained technicians offer over 100 years of combined mechanical, electrical, and hydraulic experience available to help get your aerial lift back to ANSI standards.

Parts

Power Equipment Leasing is Chicagoland's representative for Time Manufacturing/Versalift and Elliott Equipment Company in Illinois. We get parts direct from the manufacturer. We can also get parts from other manufacturers.

ANSI Inspections

It is every owners responsibility to have properly maintained equipment. Our staff is trained and certified to conduct inspections to ANSI standards. Do you have an insulated aerial lift and need it to be di-electrically tested? We offer di-electric testing, up to 100 kilovolts, to keep you in compliance.

At Power Equipment Leasing Company, aerial lift safety is a priority. We work closely with the Crane Institute of American to make sure our inspectors are trained and certified in the latest ANSI Standards. Our certified inspectors perform a through visual inspection and operational test, to include di-electric testing of boom sections and bucket liners.
